STUD HISTORY

Avonside Merino Stud was founded in 1990 at the family property "Avonside" near Berridale. The stud moved to its new home "Muniong" between Cooma and Adaminaby in 2010. Our aim to produce large framed, structurally sound sheep, capable of consistently producing heavy fleeces of fine-medium wool remains unchanged. Over the years we have reduced adult fibre diameter to 18 -19 micron, whilst still making gains in both wool cuts and bodyweights.

Emphasis has been placed on wool quality, which must be stylish, well nourished, long stapled with superior handle and measurements. We believe that this blend of fine-medium wool, combined with high body and fleece weights is consistently the most profitable.

The fantastic loyal support from our clients continues to drive our passion to breed and offer functional and profitable merinos. It gives us the confidence to invest in industry leading genetics, both through AI and the purchase of new sires to further enhance the profitability of our genetics. Industry leading genetics have been sourced from studs including Roseville Park, Langdene, Tara Park, Yarrawonga, and Cottage Park to ensure that we are producing rams that breed true to type, heavy cutting profitable merinos.

FABSTOCK

LIVESTOCK VITAMIN / MINERAL SUPPLEMENT

Fabstock is a Vitamin/Mineral supplement in granular form providing livestock with cost effective health and production benefits all year round. The following mixes provide your livestocks additional nutritional requirments for any grazing situation from fattening lambs in a feedlot situation through to ewes lambing down on stubble. The basic Fabstock ration was formulated over 25 years ago by well known Western Australian nutritionist Peter harvey and has been improved over time using the latest nutritional research and ingredients.

LACTATION PASTURE MIX

This mix is for sheep and cattle before and after pregnancy. Contoining higher levels of Colcium, Magnestian and Pregnants. This mix will help in the prevention of Grass Letany and Pregnancy Toxoemia. This mix will also increase weight gains for livestock grazing winter postures and ceroal crops.

FEEDLOT MIX

This mix is designed for sheep and cattle to obtain maximum body weight gains in a feed of situation. As well as providing all essential Villamins, minerals and those elements Fobsfock Feedlet mix also contains buffers and Bevatec to help central adiabasis and promote healthy growth levels.

KICK START

This mix is designed to assist in the stimulation and development of the immediate weamer runner therefore belighing in the presention of weamer self-scale. Rick Start contains all the necessary Vitamins and minerals needed to keep your weamer going forward and old in the build up of the lumnum system. Devilose and Sevetes: ald in the build up of the lumnum system. Devilose and Sevetes: ald in the party growth of your weamer.

RAMBOOSTER

A special mix designed by Peter Horvey to assist studbreeders in obtaining mealmitm beey growth whileassisting in improving nourishment and quality of weal in their young rems

STUBBLE MIX

Stubble mix is designed to obtain maximum production from low value dry summer feed such as cercal crop stubbles and dry natural pastures. With the use of misthionine, Sulphur, Urea and Vitamin D your livestocks appetite for dry food can be stimulated and this feed can fren be converted into higher protein levels.
